

Now a Real Book on the Internet: Fat Ladies In Spaaaaace!

I was just writing up a giveaway post for this coloring book saying "Now, it's not available for purchase quite yet, but while we're waiting..." and I checked my CreateSpace account for the second time this morning, on a whim, to find that it's now got listings!

That's right, Fat Ladies In Spaaaaace is now a real book that you can buy on the internet!

[Here it is on CreateSpace's e-store!](#)

And [here it is on Amazon!](#)

Go forth and buy/ogle! And stop by here later for more news on that giveaway, complete with free downloads of a few of my favorite coloring pages.

(You all rock. This project never would've gotten this far without the wonderful, excitable folks who've been egging me on for the past year.)

(Edited to reflect that it's now live on Amazon as well! Yay!)
