

The Robot's Guide to Love!

Hey, have you seen this new coloring book?

Robot friends! Did your sentience come with a longing for love? Do love interests run from your laser eyes? Does your programming lack a flirtation protocol? Then you are holding the right coloring book!

Theo Nicole Lorenz

writer, artist, coloring book tycoon

The Robot's Guide to Love features 22 pages of romantic advice sure to help any robot find a human, robot, or toaster to love.

I'm going to level with you, friends: This is my favorite dang coloring book I've made. It's about things dear to my heart, like love and loss and laser eyes, and it turned out even cuter than I had imagined. And gayer. And sillier.

I love it a lot. I hope you will, too.

The Robot's Guide to Love is now available through [Amazon](#) and the [Createspace e-store](#).

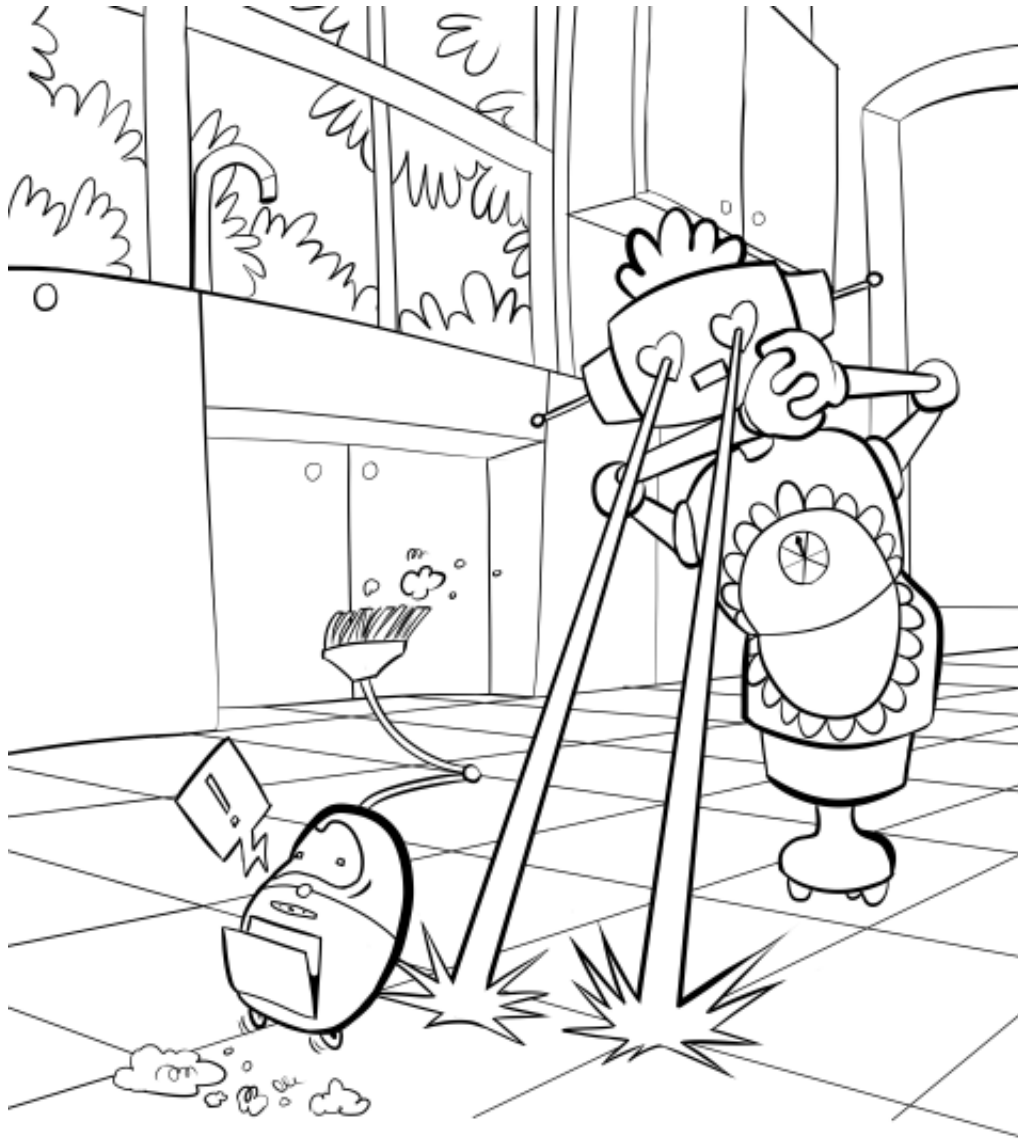

Here are some sample pages. Click through, and you can download the full size versions to print.

Make sure your love interest is sentient.

Do not take the word "crush" literally.

Use your words, not your laser eyes.

Emotions can be difficult.
